‘Sprinkle On – Crabgrass Gone’

Kansas City, MO – Garden Weasel® AG Crabgrass Killer today announced that it has become a sponsor of “GardenLine,” hosted by Randy Lemmon, the Texas Gulf Coast’s premiere gardening talk show host.

Garden Weasel AG is a natural-acting crabgrass killer. Randy Lemmon had used the product and recognized it as safer to use around people and pets, even prior to the sponsorship.

“We are very proud that Garden Weasel Crabgrass Killer is now an official sponsor of Texas’ best gardening talk show- hosted by Randy Lemmon, who offers the best of gardening advice,” said Webster Thompson, Vice-President of Garden Weasel.

Garden Weasel is best known for its well-advertised soil cultivation tools, such as Garden Weasel and Garden Claw®.

Garden Weasel AG is offered for sale in independent hardware stores and garden centers in Houston, and other Texas Gulf Coast markets; or online at www.crabgrassalert.com.

Garden Weasel AG Crabgrass Killer was formerly marketed under the Agralawn brand. “Great strides have been made in making natural ingredients into highly effective lawn and garden products,” Thompson said. “And having a “green” crabgrass killer under the Garden Weasel umbrella complements our lines of non-polluting manual tools. Having a talk show host the caliber of Randy Lemmon as an advocate of our natural approach is icing on the cake,” Thompson added.

Garden Weasel AG, a post-emergent herbicide, is applied directly as a powder to moistened Crabgrass, Basketgrass, Chickweed, Clover, and similar weeds. When used properly, Garden Weasel AG kills existing crabgrass without harming St. Augustine, Bahia, Common Bermuda, or Centipede grass.

The product may be applied whenever the grass is not dormant, and air temperature is above 60 degrees.

Garden Weasel is a division of the Faultless Starch/Bon Ami Company. Visit www.faultless.com or www.gardenweasel.com for further information.
