

FOR IMMEDIATE RELEASE:

General Tools Wins Industry Innovation Award with the NCIT100 Hawkeye™ Non-Contact Body Temperature Infrared Thermometer

[Secaucus, NJ – September 15, 2021] General Tools has been recognized by the (PTIA) Pro Tool Innovation Awards: Test & Measurement Awards Division for the **NCIT100 Hawkeye™ Non-Contact Body Temperature Thermometer**.

As stated by the Pro Tool Innovation Awards, in the Test & Measurement Awards Division - The [General Tools' Hawkeye Non-Contact IR Thermometer](#), is a non-contact way to quickly check body temps in Fahrenheit or Celsius with an easy-to-read LCD screen. While daily temperature checks may be our reality, General Tools makes it easier to deal with.

WINNER – Temperature Meters

NCIT100 Hawkeye™ Non-Contact Infrared Thermometer

The Hawkeye Non-Contact Infrared Thermometer is designed for quick and concise body temperature measurements. Unlike other infrared thermometers, this unit is intended for non-contact measurement of human body temperature.

Ideal for mass temperature screening and monitoring without contact or fear of contamination for workplaces, public events, and social gatherings. The thermometer has a large, easy-to-read color-changing LCD screen display with a Fahrenheit or Celsius readout.

The NCIT100 Infrared Thermometer provides the extra layer of protection public places will need in the reopening process. In this day-in-age, fast results are crucial for survival. HawkEye provides these with ease, without the need for close contact. A portable device like this is not just efficient, it's necessary, especially for on-site workers, business owners and stores.

Features Include:

- **FAST, ACCURATE** - Designed for fast and accurate body temperature measurements
- **MASS TEMPERATURE SCREENING and MONITORING** - Ideal for workplaces, public events and social gatherings
- **EASY TO READY TEMPERATURE ALERTS** - Large, easy to read color changing LCD screen display with temperature alerts
- **QUICK TEMPERATURE MEASUREMENTS** - temperature measurements within 2 seconds
- **INCLUDES** – 2 AAA alkaline batteries

What Pro Tool Innovation Award Judges had to say about the NCIT100:

We live in a Covid world and among the many consequences of it, we have thermometers for checking equipment and thermometers for checking crewmember body temperatures. For the latter, check out [General Tools' Hawkeye Non-Contact IR Thermometer](#). Priced a little over \$25, it's a non-contact way to quickly check body temps in Fahrenheit or Celsius with an easy-to-read LCD screen. While daily temperature checks may be our reality, General Tools makes it easier to deal with.

About the Pro Tool Innovation Awards

Each year the Pro Tool Innovation Awards are judged by a panel of industry professionals who handle and use hundreds of new tools each year. From personal use on the job site to exposure to tools at media events and industry trade shows, their team can spot innovation a mile away.
