KANSAS CITY, MO – Garden Weasel today announced a marketing agreement with the inventors of GardenGlide, a patent-pending new product that transports heavy, hard-to-carry items.

Garden Weasel first saw the GardenGlide in the Inventor's Spotlight section of the 2008 National Hardware Show, and became the vendor of record for the item within nine months.

"It's great that we could sign Jim and Liz Feeney to put GardenGlide into the Garden Weasel product mix," said Webster Thompson, Vice-President of Garden Weasel. "GardenGlide is a low cost alternative to the wheelbarrow. I use it frequently to move mulch, plants, firewood, coolers... all kinds of stuff, in my own yard. And it takes up almost no storage space in my crowded garage!"

GardenGlide's snow saucer shape minimizes lifting and carrying, is easy to store, and has no wheels to deflate or dig into soft surfaces. But unlike snow saucers, Garden Glide has tough reinforced sides, a strong handle, and a flat bottom that easily glides over almost any surface. GardenGlide is made from 100% recycled materials, so it's an environmentally preferred product, as well as a low cost alternative to expensive wheel barrows and garden wagons

Garden Weasel invites trade guests to see GardenGlide at booth #68045, at the 2009 National Hardware Show, in Las Vegas, May 5-7.
